# Introduction

- Your introduction goes here!
- Use `itemize` to organize your main points.
  - up to 3 text levels with `itemize`
    - Indents increase level by level, font size decreases
    - Should you require more levels, use `description` instead of `itemize`.
    - Note: Please try not to write too much copy onto your slides.

**Table 1:** An example table.

UNIVERSITAT POLITÈCNICA  
DE CATALUNYA  
UPC  
BARCELONATECH

Let  $X_1, X_2, \dots, X_n$  be a sequence of independent and identically distributed random variables with  $E[X_i] = \mu$  and  $\text{Var}[X_i] = \sigma^2 < \infty$ , and let

$$S_n = \frac{X_1 + X_2 + \dots + X_n}{n} = \frac{1}{n} \sum_i^n X_i$$

denote their mean. Then as  $n$  approaches infinity, the random variables  $\sqrt{n}(S_n - \mu)$  converge in distribution to a normal  $\mathcal{N}(0, \sigma^2)$ .

```
fixmodel_bin(data, arm, alpha = 0.025,  
ncc = TRUE, check = TRUE, ...)
```

Thank you for the attention!
